Weber SmokeFire™

Innovation is rooted deep in Weber's DNA and we are excited to have redefined the barbecue market with our most connected barbecue ever. Deliver perfect cooking results straight to your backyard when you connect to the Weber SmokeFire™ for the very first time. Weber's legendary black porcelain enamel coat and stainless steel trimming is just the tip of the iceberg when it comes to the SmokeFire.

The first time you see the Weber SmokeFire, you know it's something special. It might be the hardware which empowers you to barbecue with Weber's renown flavour. The stainless steel Flavorizer® bars catch any drippings and transform them into flavour packed smoke which envelops your food above. Food which sits on two levels of cooking grill space, giving you the flexibility to cook for a few or a crowd; made from stainless steel they not only look amazing but will stand the test of time. Coupled with the large rear-mounted hopper, fill to the brim with 9 kilograms of hardwood pellets and you're ready for up to 15 hours of flavour packed barbecuing.

It might also be that wherever you go, you can use Weber Connect™ through Bluetooth® or WiFi to remotely monitor and control your SmokeFire. This is control like never before. Adjust the cooking temperature, set timers and alerts, follow step-by-step barbecuing recipes, activate special features such as SmokeBoost™ and even turn your SmokeFire off at the tap of a screen. With Weber Connect as your barbecuing companion, never again miss a flip, spritz, baste or final doneness.

All of this amazing functionality is supported through the ingenious inclined auger which feeds life to the SmokeFire. Calibrated to feed the perfect amount of fuel into the burn pot, the SmokeFire quickly and reliably achieves your

desired cooking temperature, then maintains it. Be it hot or cold, windy or still, the SmokeFire works so you don't have to. Enjoy the company of family and friends knowing you're in total control of the perfect meal. The Weber SmokeFire; authentic wood fired flavour.

Your Weber SmokeFire™ comes with in-built Weber Connect™ smart technology, which is your secret ingredient to perfectly barbecued food. It's a step-by-step barbecue assistant that sends notifications directly to your smart phone for everything from a food readiness countdown, to when it's time to flip and serve. All it takes is a glance at your phone to know that everything is on track and barbecuing to perfection.

Link up via Bluetooth® or WiFi and you'll be instantly in complete control. Don't miss a step as you're able to receive flip and serve notifications, select doneness (e.g. medium-rare steak) and receive alerts when your food is ready. More than that you'll be able to monitor food readiness countdowns and estimated cook times, as well as follow step-by-step assistance from barbecue setup to when it's time to eat. Your Weber SmokeFire will come with one meat probe ready to go, and you can purchase additional probes to monitor multiple cuts at the same time.

Whether you just want to know when your foods ready to serve, or want to be able to monitor every element of your cook, the SmokeFire thanks to Weber Connect has the smart barbecuing capabilities to cater for you!
