

# INSTALLATION GUIDE

## Cordoba DC Ceiling Fan

### Models Parameters (Fan Only):-

MCDC133MWN	1320mm 3 ABS Blade WiFi & Remote Control Ceiling Fan Matt Black/Walnut
MCDC133W	1320mm 3 ABS Blade WiFi & Remote Control Ceiling Fan Matt White
MCDC133WO	1320mm 3 ABS Blade WiFi & Remote Control Ceiling Fan Matt White/Oak

### Models Parameters (Fan and LED Light):-

MCDC1333MWN	1320mm 3 ABS Blade WiFi & Remote Control Ceiling Fan with Variable Dim 18W CCT LED Light Matt Black/Walnut
MCDC1333W	1320mm 3 ABS Blade WiFi & Remote Control Ceiling Fan with Variable Dim 18W CCT LED Light Matt White
MCDC1333WO	1320mm 3 ABS Blade WiFi & Remote Control Ceiling Fan with Variable Dim 18W CCT LED Light Matt White/Oak

### Application

#### **CAUTION**

READ INSTRUCTIONS  
CAREFULLY FOR SAFE  
INSTALLATION AND FAN  
OPERATION

**MUST BE  
INSTALLED BY  
A LICENSED  
ELECTRICIAN**

# SAFETY PRECAUTIONS

## **WARNING:**

**To ensure safe operation, this fan requires a complete electrical isolation switch (all-pole disconnection type) installed in the fixed wiring, as mandated by AS/NZS 60335-1, clause 7.12.2**

The warranty becomes void if the product was installed without an all-pole disconnection as per the instruction manual by a qualified and licensed electrician.

Example: When a ceiling fan's electrical circuit is equipped with an all-pole safety switch at the switchboard for isolation, it achieves all-pole disconnection as specified in AS/NZS 60335.1, clause 7.12.2.

IMPORTANT: An isolation switch must be included as part of the installation by the electrician.

1. Limited Use: This appliance is not designed for use by individuals (including children) with reduced physical, sensory, or mental abilities, or those lacking experience or knowledge, unless supervised or instructed by a responsible person.
2. Child Supervision: Children must be supervised to prevent them from playing with the appliance.
3. Weight Capacity: The mounting structure must support at least 20kg.
4. Ceiling Support: Secure mounting requires solid bracing (timber noggins or joists) in the ceiling. If unavailable, install a timber support secured to the joists. Metal grid ceilings are unsuitable.
5. Bracing Support: The bracing must be firmly secured to the back of any non-structural ceiling panel (e.g., gyprock, plaster) for safety and quiet operation.
6. Blade Clearance: For safe and effective operation, maintain a minimum fan blade clearance of 2.1m from the floor.
7. Professional installation: Installation must be performed by a licensed electrician.
8. WARNING: If unusual wobbling or oscillation occurs, immediately stop using the fan and contact the manufacturer.
9. WARNING: Light and fan must be on the same phase. Before servicing, ensure both light and fan circuits are disconnected.

# PACKING LIST

UNPACK THE CEILING FAN CAREFULLY AND IDENTIFY ALL PARTS.

## FAN ONLY MODEL

### Part List:-

- 1. 1× hanging bracket
- 2. 1× motor assembly
- 3. 1× bottom plate
- 4. 1× bottom cover
- 5. 3× blades
- 6. 1× remote control unit
- 7. 1× hardware bag
- 8. 1× instruction manual

## FAN + LED LIGHT MODEL

### Part List:-

- 1. 1× hanging bracket
- 2. 1× motor assembly
- 3. 1× LED light kit
- 4. 1× light shade
- 5. 3× blades
- 6. 1× remote control unit
- 7. 1× hardware bag
- 8. 1× instruction manual

**PLEASE NOTE:** Check for any damage to the fan prior to installation.

Physical damage such as marks and scratches are not covered by the in-home warranty.

In this case, please contact the Four Seasons support team to discuss replacement parts.

# BEFORE INSTALLATION

## MOUNTING BRACKET

- The ceiling fan must be installed in a location where the blades have a minimum 300mm spacing from the tip of the blade to the nearest objects or walls.
- Secure the mounting bracket to a ceiling joist/structure that can carry a load of at least 20kg with included screws, ensuring 30mm minimum screw penetration.

NOTE: THIS PICTURE IS FOR ILLUSTRATIVE PURPOSES ONLY AND DOES NOT REPRESENT THE ACTUAL BRACKET.

## ASSEMBLY OF THE FAN

- ① Detach canopy bottom cover.

- ② Remove the three pre-installed screws from the motor assembly.

# ASSEMBLY OF THE FAN

- ③ Align the holes on the blade with the corresponding ones on the motor assembly. Then, use the blade screws to secure the blades in place and tighten them. Repeat this step until all blades are installed.

## FAN ONLY MODEL

- ④ Align the holes on the bottom plate with the corresponding holes on the motor assembly. Then use the 3 screws removed in the last step to install the bottom plate onto the motor assembly.

## FAN + LED LIGHT MODEL

- Connect the wiring terminal. Align the holes on the light kit with the corresponding holes on the motor assembly. Then use the 3 screws removed in the last step to install the light kit onto the motor assembly.

- ⑤ Align the locking points on the lampshade with the slots on the light kit. Rotate the lampshade until it is securely fixed in place.

# MOUNTING BRACKET INSTALLATION

- ① Loosen the two screws (without fully removing them).

- ② Before installation, make sure that the power to the main is turned off. Align the bracket and screw the hanger bracket to the ceiling tightly.

The minimum board size for installing

## HANGING THE FAN

- Carefully lift the assembled fan onto the mounting bracket, ensuring the hanger ball slot (A) is completely seated and engaged with the mounting bracket tab (B). This proper engagement prevents fan rotation during operation.

# ANGLED CEILING INSTALLATION

This fan hanging system supports a maximum slope of 10 degree ceiling. If there is a greater slope, then an angle ceiling canopy accessory kit is required.

**IMPORTANT:** To maintain safety and functionality on raked ceilings, the hanging bracket tab (B), which engages with the hanging ball groove (A), must be installed at the highest point of the ceiling.

## INSTALL RECEIVER REMOTE CONTROL

- ① Put the receiver in the bracket.

- ② Wire in accordance with the wiring diagram. If you are not familiar with wiring or have any doubts, please consult an electrician.

### FAN ONLY MODEL

# INSTALL RECEIVER REMOTE CONTROL

## FAN + LED LIGHT MODEL

- Receiver must be correctly installed within the mounting bracket.
  - When the transmitter cannot control the receiver, please check:
    - i) has sufficient battery in the transmitter, even if the indicator light on transmitter lights up there may not be enough voltage to transmit a command.
    - ii) any existence of similar remote controlled products nearby that cause interference.
  - Replace battery if getting low as this will affect transmitter sending commands.
  - Take the battery out from the transmitter when leaving unused for a long time to avoid battery leaks.
- Isolation switch must be connected in the line.

## FINISHING THE INSTALLATION

- Tidy up wires, then slide the canopy upwards towards the bracket and align the holes with the screws. Rotate the canopy anticlockwise until it locks into place, be careful not to damage or cut the wiring, then tighten the screws; push the bottom cover of the canopy upwards to fit it into the canopy.

# REMOTE CONTROL

**PLEASE NOTE:** The remote handset cannot be used either simultaneously or in conjunction with a wall controller. Unless otherwise advised by Four Seasons.

FAN ONLY MODEL	
	Fan off only.
	Sleep Mode: turns on the fan at an extra lower speed to create a gentle breeze.
Fan Speeds	Speed button 1= lowest fan speed, 6= highest fan speed.
	Wind Mode: 1-6 fan speed changes randomly to feel the breeze (designed for the elderly and children)
	Summer/Winter Reverse Mode: forward (spins clock wise with highest part of the blade trailing) and reverse (spins counter clock wise with highest part of the blade leading).
	Entering WiFi Pairing mode
1h/4h/8h	Preset timer for fan to stop automatically. E.g. if timer set at 1h and then 4h, fan will stop at 4h. Setting default to last press. To engage time this has to be last button pressed after selecting speed, pushing any other button after selecting timer will cancel it.

FAN + LED LIGHT ONLY MODEL	
	Fan off only.
	Sleep Mode: turns on the fan at an extra lower speed to create a gentle breeze.
Fan Speeds	Speed button 1=lowest fan speed, 6= highest fan speed.
	Wind Mode: 1-6 fan speed changes randomly to feel the breeze (designed for the elderly and children)
	Summer/Winter Reverse Mode: forward (spins clock wise with highest part of the blade trailing) and reverse (spins counter clock wise with highest part of the blade leading).
1h/4h/8h	Preset timer for fan and light to stop automatically. E.g. if timer set at 1h and then 4h, fan will stop at 4h. Setting default to last press. To engage time this has to be last button pressed after selecting speed, pushing any other button after selecting timer will cancel it.
	Light on/off.
CCT	Changeable colour temperature, 2700K (warm white) up to 6000K (cool white)
+/-	+ = increase light brightness, - = decrease light brightness

# REMOTE CONTROL OPERATION

A remote control consists of two parts:

1. Handset / controller (transmitter).
2. Receiver (receives message from the handset and is located in the upper canopy of the fan)

**IMPORTANT:** If you have multiple fans in the house, you must pair them one at a time to their corresponding transmitter. Power must not be on to other fans while pairing or you will inadvertently pair multiple fan's to only one transmitter. If this occurs, you need to use the reset function and begin re-pairing with power only on to the fan being paired.

## Pairing the remote control:

Step 1: Turn on the ceiling fan.

Step 2: Within the first 20 seconds, continue pressing the button with the symbol  until you hear a beep sound. It is paired. If you don't hear a beep sound, turn off the ceiling fan and start step 1 and step 2 again.

Step 3: Open Smart life app and click add device and fan should automatically appear press connect. Fan should now be controllable via the smart life app (see following page).

## To unpair the remote control:

Push and hold "4h" "8h"  at the same time for 5 seconds. The remote is unpaired after a "beep" sound.

## Pairing with WIFI:

Please ensure your smart phone or device is connected to a 2.4Ghz WI-FI network.

Pairing will NOT work with a 5Ghz WI-FI network.

Please ensure the fan is within range of the WI-FI router.

Please follow instructions in the following pages to pair the fan with smart devices.

## Entering WiFi Pairing mode: Fan Only Version

1. Turn on the power.
  2. Within the first 20 seconds, press and hold the "" button until a "beep" is heard.
  3. Continue step connect on your smart devices to complete the pairing.
- If you don't hear a "beep" sound, repeat the above steps.

## Entering WiFi Pairing mode: FAN+LED Light Version

1. Turn on the power.
  2. Within the first 20 seconds, press and hold the "" button until a "beep" is heard.
  3. Continue step connect on your smart devices to complete the pairing.
- If you don't hear a "beep" sound, repeat the above steps.

# SMART LIFE MATCHING PROCESS

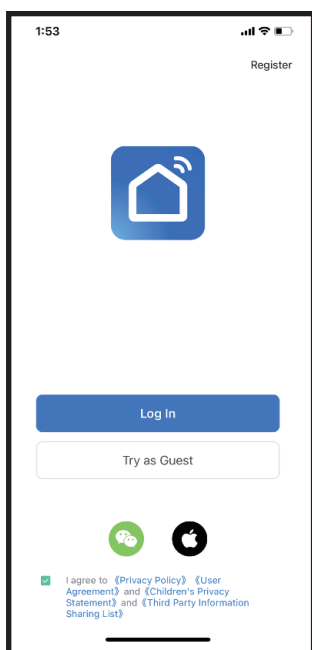

Smart Life matching process, please follow the steps:

1. Download the "Smart Life" APP on your smart devices by scanning the QR code below with camera.

2. Turn on WiFi and Bluetooth on your smart devices. Ensure it's connected to a 2.4GHZ WiFi.

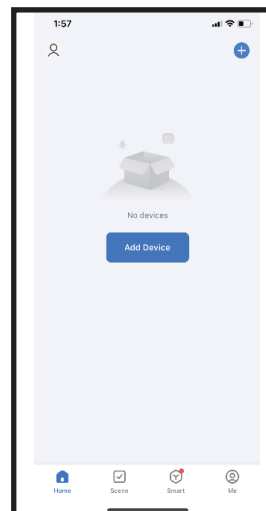

3. Open the APP, follow the steps to register new user account or login existing account.

4. Follow instructions in main manual (steps can also be found on the back of the remote) to put the fan into WiFi pairing mode. If the operation is successful, go to step 5. If the fan has previously been paired or you can't get it to work, please go to step 4 to RESET the fan.

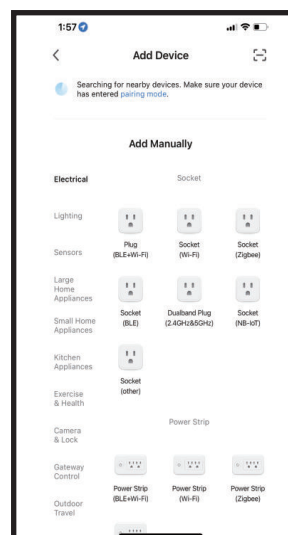

5. RESET the fan. This step is NOT necessary if the fan has successfully entered WiFi pairing mode in the last step, if not, try to RESET the fan: turn on the fan, power off after 10 seconds, power on again after 15 seconds, long press "Fan Stop" for 5 seconds, if "beep beep" are heard, the reset is successful. If "beep beep" is not heard, the reset is failed, please repeat this step.

6. Once the fan has entered WiFi pairing mode, open the APP again on the smart device. Click "Add Device" in the middle or the "+" on the top right of the screen.

7. The auto scan should begin automatically, and the fan should show up at the top of screen within a few seconds.

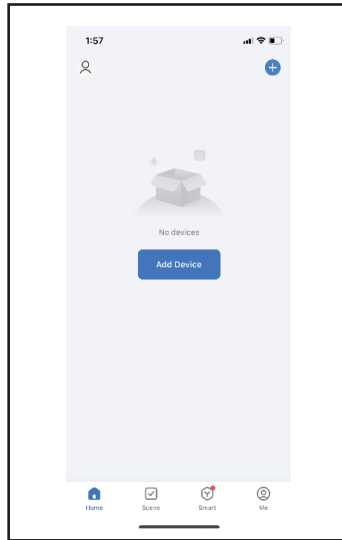

Note: If the fan is not showing up, you can add it manually by clicking and navigate to: >Add Manually>Small Home Appliance > Fan

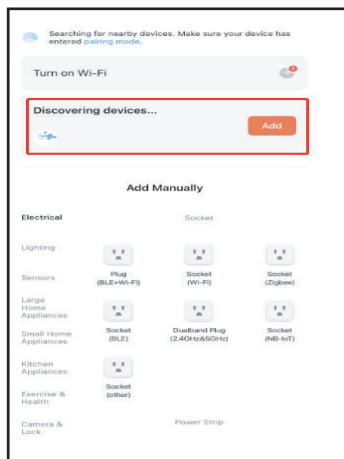

# SMART LIFE MATCHING PROCESS

8. Follow instructions in the APP to finish the set up.

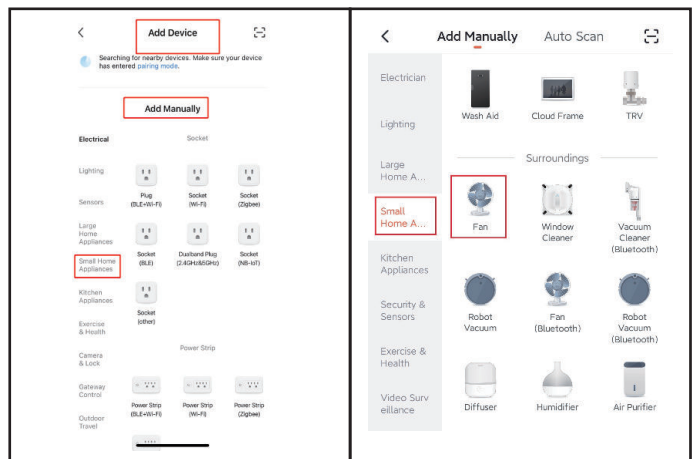

①

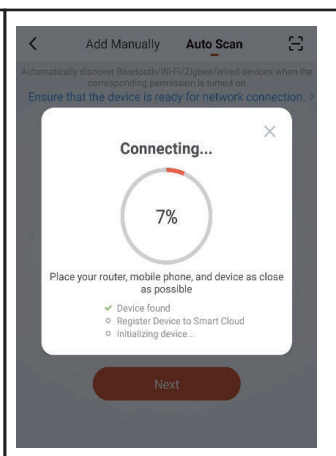

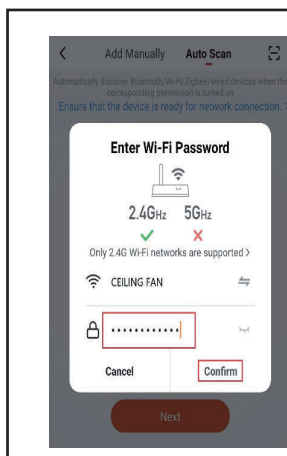

② Automatic Search

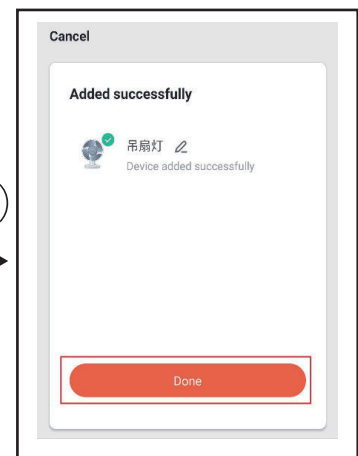

② Manually Add

③

# IMPORTANT FACTS

## Fan Operation:

The DC ceiling fan has been designed for a very fast installation, maximise airflow with minimal energy usage and operate as quietly as possible. Unlike high-speed traditional fans, ceiling fans generate a gentle, high-volume airflow that promotes evaporative cooling. This method is highly effective for cooling people and consumes significantly less power than air conditioning.

Remote controlled fans must be installed with an isolation switch on the wall.

Warranty is void if parts are used that are not MARTEC products, including but not limited to remote controls, receivers, led lights, switches, wall control, dimmers, extension rods and angle canopies.

Pairing multiple fans to one remote - Pair fan 1 using the pairing instructions, using the same remote pair fan 2 in the same way with power on to all fans to be paired to the transmitter.

When using the timer, the timer button must be the last button pressed, if another button is pressed after the timer button, the timer is cancelled.

This remote has a memory function, this means if there is a power outage, the fan will restore the same function as when the power was cut. If the isolation is switched off and then turned back on, the fan will resume the function it was operating at, before being switched off.

## Normal Wear and Tear:

Normal wear and tear, such as loose screws or increased noise due to moving parts, and damage from accidental contact are not covered under warranty. However, regular maintenance, including tightening screws and changing batteries seasonally, can significantly reduce these issues.

## Night Noise:

It's important to know that while the DC ceiling fan is designed for quiet operation, all electric motors make some noise. If you hear a humming sound, it may be due to ripple control signals from your electricity provider, which is normal. Also, a short beep will sound when you use the remote, confirming the fan has received your instruction.

# MAINTENANCE

## CARE AND CLEANING:

**IMPORTANT:** For your safety, always disconnect the power at the main switch before any fan maintenance or cleaning.

- Never submerge the ceiling fan in water or any liquids. This can cause damage to the motor and blades, and create an electrical shock hazard.
- Avoid contact with organic solvents or cleaners on any part of the fan.
- Clean the fan blades with a damp, clean cloth only. Do not use organic solvents or cleaners.
- The motor's bearings are permanently lubricated; no oiling is required.

## TROUBLE SHOOTING

SIMPLE TROUBLESHOOTING	
Symptoms	Troubleshooting
Fan not responding to remote	Is isolation switch turned on?
	Is there new batteries in the remote?
	Is the remote paired using the pairing instructions on the website?
Ticking sound	Tighten all nuts, bolts and screws.
	Check installation.
	Is the fan clean and free of debris, insects or any foreign matter?
Fan not moving air (cooling) as expected	To cool the room the fan should be spinning anti-clockwise
WiFi fan not pairing (If fan is WiFi enabled)	Ensure 2.4GHz WiFi connection, 5G connection will not allow the fan to connect.

FAQs	
Question	Answer
Receiver beeping when I press the buttons on the remote.	This is a setting that cannot be switched off, it is to confirm that the command has been received by the fan
What happens if I have a power outage?	These fans have memory and will resume the settings prior the power outage, if pairing is lost in the outage, please follow remote pairing instructions

# WARRANTY INFORMATION

## 6\* Year Warranty

(3 Year In-Home + additional 3 Year Replacement on the motor only)

For further information please visit our website (link below) OR scan the QR code.

<https://www.martecaustralia.com.au/warranty-statement/>

For technical support, please contact MARTEC customer service hotline at **(02) 8778 7500**. This fan is suitable for both indoor and covered outdoor areas, as defined in our warranty statement.

To ensure the fan remains in optimal condition, it should be protected from the elements. Exposure to excessive wind, dust, water, or salt air may cause damage that will not be covered under the warranty.

If your fan includes a light, do not remove the light panel, as doing so may cause damage not covered by the warranty. For assistance, feel free to reach out to our customer service team.

If you suspect any issues with the installation, please contact your installer to resolve the matter. In case you believe the issue is related to a manufacturing defect, you can file a warranty claim by visiting <https://www.martecaustralia.com.au/warranty-claim-form> or scan below QR code.

**IMPORTANT NOTICE:** All claims for warranty must be accompanied with the following three documents:

1. Copy of the Installation Receipt OR Tax Invoice OR Certificate of Compliance for the installation of the MARTEC product from the installing electrician.
2. Copy of the Purchase Receipt for the MARTEC product, and accessories such as extension rod or remote control.
3. Submit an online warranty claim form. Please ensure that the purchaser's full name and contact details are clearly stated, in addition to the full nature of the fault and the serial or P.O. number which can be located on the top motor housing above the Ceiling Fan Blades.

It is the responsibility of the purchaser to keep the documents required for a warranty application for the duration of the warranty period.

**Customer Service operates between 8AM to 4PM EST Monday to Friday.**

**Customer Service Number: (02) 8778 7500**
